

ENGINEERS WITHOUT BORDERS

AT ARIZONA STATE UNIVERSITY

ABOUT EWB at ASU

EWB aims to create a more stable and prosperous world by addressing communities' basic human needs in clean water, power, and education. We are committed to connecting Arizona State University students to the professional mentors and resources they need to design and implement low-cost, small-scale, easily-replicated, and sustainable engineering projects.

Projects

International

The International Team is currently working to improve access to clean water resources for a small village in rural Eastern Kenya where the most reliable sources of drinking water are currently cow ponds.

Mountain Biking

The Shonto Mountain Bike Initiative is stimulating local Navajo Nation economies and improving adolescent health by created bike tracks and trails in their scenic desert.

Solar

As many in the Navajo Nation do not have access to reliable electricity, the Solar Project is committed to designing and building smart solar arrays for the people in the Navajo Nation that need them most.

Irrigation

After a catastrophic dam failure lowered the water table in the Shonto region, farming has not been the same. The Irrigation Project is designing and building a system of check dams to restore the water table and Shonto's agricultural ability.

Run Without Borders

5K Run

[How your company can help us help the world!](#)

The Engineers Without Borders Chapter at ASU has hosted multiple 5K runs in the past in order to raise funds for its projects which have had 300+ attendees. The event takes place on ASU's Tempe campus, and is a prime way for reach out to the ASU and the nearby Tempe and Phoenix community which will be attending the event. The perks outlined below could include having a booth at the event and being introduced by the event MC, being able to have a post on our social media accounts for our hundreds of followers, having your company's logo on our general body and leadership shirts, and being able to come in and present at one of our general body meetings.

Please consider the opportunity to join our chapter in helping the world one engineering project at a time.
